

## LANmark-7 1xRJ45 2xRJ11 Splittercord GG45

### Product features

- LANmark 7 Splitcords allow several services to be run simultaneously using a GG45 permanent link and provide four individually screened pairs. The GG45 socket routes this pair screening internally via a metal cross - this allows the pairs to be individually actuated without the different signals interfering with one another.

- The GG45 Splitcord has a GG45 connector on the wall socket side and 1xRJ45 CAT.5 and 2xRJ11 for voice on the device side.
- 1x Ethernet RJ45 CAT.5 - 2 x Voice RJ11
- Characteristic impedance: 100 Ohm
- Flame-retardant acc. to IEC 60332-1-2

## S-FTP Patchcable Crossover RJ45 CAT.5e

### Product features

- For interconnecting two computers without the use of a central active component (hub, switch...).
- Foil and braid screening, 150 MHz
- Halogen-free
- Hirose TM 11 connector
- Sheath and anti-kink sleeve colour: red.
